

Moon Picnic

by Joe Little, aged 7

My story is set 100 generations in the future, all the Humans and bears are now Cyborgs.

In school, Class 2 are being shown old human forms and traditions by Mrs Givings all day, Burnard was sitting on Mrs Givingses desk and is the school mascot.

Eric is a pupil, now he is going next door which is his house and went to his bed to charge up his battery.

Then suddenly he heard a bear moving in the bushes so he woke up and looked outside. He saw Burnards eyes looking up at him, so Eric went downstairs and searched for him then Burnard took Eric's hand and flew off into space to the Moon AKA Bear planet.

They found a picnic spot with a luxurious picnic blanket and had a picnic for 3 Hours. Then all the other bears joined in having a party for 1 hour.

Eric had to go home now and the bears were sad but Burnard flew Eric home into his bed safe and sound.
